

The Happiness Factor

*A glimpse at 'happiness' values across
the globe, analysis of the World Happiness Report
from 2015-2019*

Jeffrey N., Tina Z., Calvin L., Steve M.

Motivations for initial analysis

Define and visualize happiness across the world during the period 2015-2019, according to the World Gallup Poll.

Utilize python tools and libraries to explore any hidden correlations between variables and find out which countries/regions were the happiest

Datasets

- { } World Happiness Report data, 2015-2019 (Kaggle)
- { } Country coordinates .csv (Google)

World Happiness Variables

“Happiness Score”

“Family” - perceived level of social support from family & friends

“Health” - healthy life expectancy at birth (from WHO data)

“Freedom” - satisfaction with their freedom to choose what to do with their life

“Generosity” - have they donated to charity in the past month

“Trust” - perception of corruption in government/institutions

GDP - World Bank data

Questions for Analysis

- What are the happiest countries? Least happy?
- How is happiness distributed across the world, are there any regional differences in happiness level?
- Top 10 change across time
- Correlations and linear regression

Data cleanup & exploration

Coordinates

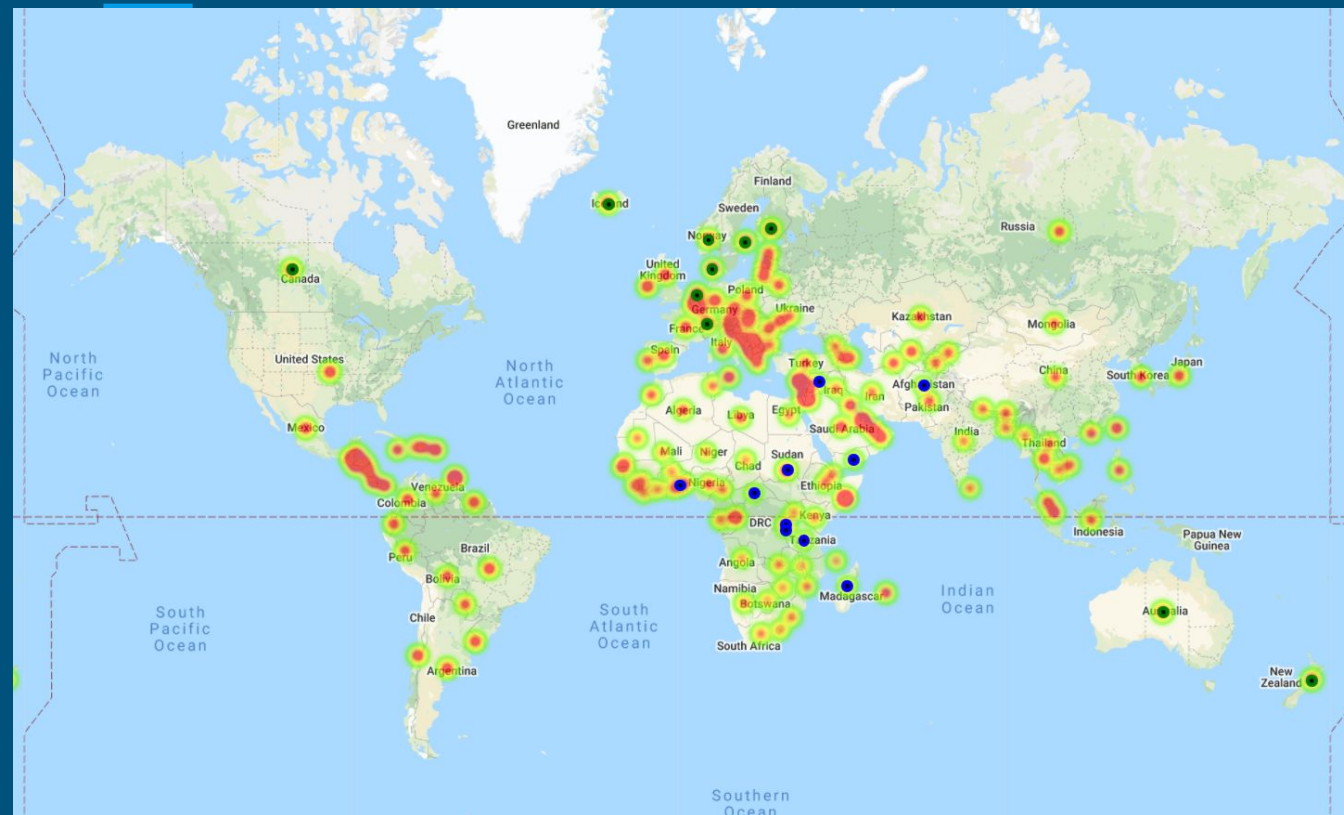

Country spelling

Region name differences, missing values

Missing “dystopia residual” for two years’ data

Countries may not have participated every year

Country Happiness Heatmap

Top Ten (Green)

	Region	Country
0	Western Europe	Denmark
1	Western Europe	Norway
2	Western Europe	Finland
3	Western Europe	Switzerland
4	Western Europe	Iceland
5	Western Europe	Netherlands
6	North America	Canada
7	Western Europe	Sweden
8	Australia and New Zealand	New Zealand
9	Australia and New Zealand	Australia

Bottom Ten (Blue)

	Region	Country
0	Sub-Saharan Africa	Madagascar
1	Middle East and Northern Africa	Yemen
2	Sub-Saharan Africa	Togo
3	Southern Asia	Afghanistan
4	Sub-Saharan Africa	Tanzania
5	Sub-Saharan Africa	Rwanda
6	Sub-Saharan Africa	South Sudan
7	Middle East and Northern Africa	Syria
8	Sub-Saharan Africa	Central African Republic
9	Sub-Saharan Africa	Burundi

Correlation Matrix

Allows us to see all correlations in one plot (Seaborn)

GDP vs. Happiness Score

$r = .79$

(moderately strong positive)

$R^2 = .62$

(62% of the variance accounted for by the linear regression model)

r value is: 0.7892839967173202

r squared value is: 0.6229692274740667

“Family” vs. Happiness Score

$r = .64$

(moderate positive)

$R^2 = .41$

(41% of the variance
accounted for by the linear
regression model)

r value is: 0.6365319620015423
r squared value is: 0.40517293864953285

Health (Life Expectancy) vs. Happiness Score

$r = .74$

(moderately strong positive)

$R^2 = .55$

(55% of the variance accounted for by the linear regression model)

r value is: 0.7424557422153406

r squared value is: 0.5512405291485323

Health (Life Expectancy) vs. GDP

$r = .78$

(moderately strong positive)

$R^2 = .62$

(62% of the variance accounted for by the linear regression model)

r value is: 0.7843375705680518
r squared value is: 0.6151854246045936

Country Count for each region (2019)

Discuss Findings

The happiest remained the happiest countries

- 6-7 out of 10 of the happiest countries were in Western Europe

The following comparisons showed strong positive correlations:

GDP vs. Happiness Score ($r = .79$)

Health (Life Expectancy) vs. Happiness Score ($r = .74$)

Health (Life Expectancy) vs. GDP ($r = .78$)

Several variables had stronger correlations for Top 10 vs Bottom 10 countries

Conclusion and Future Possibilities

Potential confounds:

- Limited scope of Analysis
- Missing data, countries not reported
- Country Count for each region

Future Directions and Possibilities:

- Breakdown of all 50 US States
- Include 2020 and 2021 data
- Utilize other Census measures since we have Country + Coordinates
- Machine Learning & Modeling
